

# Stay in good shape!

...with our clever stretchbands

 sanstrap®

# Your goods stay in good shape

## No more slipping or wobbling!

Whenever goods need to be secured on a pallet people usually go for stretch film, rubber bands, strapping bands or sticky tape. This can result in damage to packaging and labels. And often leads to waste, which is difficult to dispose of.

sanstrap® puts an end to all this. It saves time, money and hassle. The stretchbands are the secure, low-cost alternative to conventional methods: quick and easy to place around packages – putting an end to slipping and wobbling. This makes sanstrap® the standard equipment for warehousing and transportation.

You can use our stretchbands made of polyethylene for all kinds of packages. The elastic bands are available in a variety of sizes. So you always have the right assistant to hand for all your packing challenges. And they're simple to use: We deliver perforated rolls of sanstrap® stretchbands in handy dispensers or reusable hard boxes.

**sanstrap® stretchbands**, the ideal safeguard for internal transports.

sanstrap® takes up any challenge. For packaging and distributing, stacking and palletizing, to secure top layers of pallets, boxes, trays and bulk packs – the elastic stretchbands made from polyethylene hold together packaged goods of any kind.

sanstrap® will never leave you in a bind!  
sanstrap® gives you support in all your warehousing and transportation jobs. The stretchbands will convince you by their

- ease of use
- great elasticity
- enormous tensile strength
- different formats
- recyclability

# Always the right stretchband

We produce sanstrap® stretchbands for you in various widths, lengths and grades. So there's always the right band for every kind of container or packing job.

If you're looking for any other solutions than those listed – we're happy to help. Just ask!

## sanstrap® standard

1

### The Multi-talented 100 x 1,200 mm

Our basic product is designed to secure a variety of packages on industrial and Europallets.

2

### The Middleweight 150 x 1,200 mm

Ideally suited to medium-weight packages and odd sizes on industrial and Europallets.

3

### The Heavyweight 200 x 1,200 mm

Makes light work of stabilising drums and heavy goods.

4

### The All-rounder 100 x 600 mm

Secures smaller containers as well as half and quarter pallets.

## sanstrap® special range

1

### sanstrap® xxl – The Champion 100 x 1,400 mm

Its extremely high resilience provides optimal stabilisation for packages exposed to greater shocks during transportation.

2

### sanstrap® soft – The Lightweight 100 x 900 mm

Ideal for securing small and lighter parcels and edge protection.

3

### sanstrap® elcon anti-static

Protects delicate packages of all types: for example electronic components, chemicals or other easily inflammable products. The stretchband fulfils the criteria for a permanent anti-static agent based on surface resistance under DIN IEC 93 VDE 0303 and on mechanical testing under DIN EN ISO 291. Available in several sizes.

## Colour coding

Stretchbands can be specially ordered in different colours to bring even more order into your warehouse!

# The stretchable solution

Working with sanstrap couldn't be easier and quicker – no matter what type or amount of containers, goods or packages you want to secure.

**Pull sanstrap from the roll.**

**Tear off the stretchband at the perforated seam.**

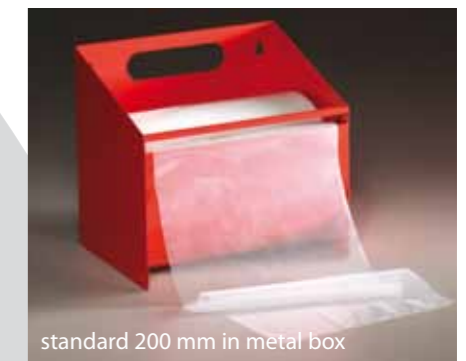

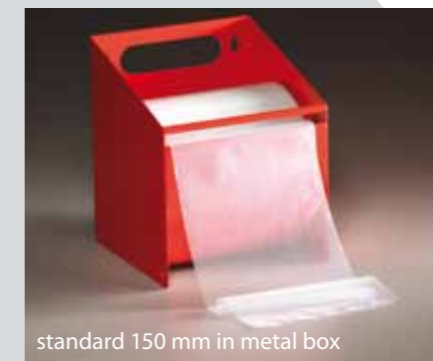

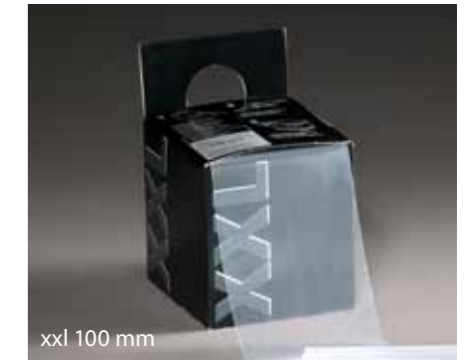

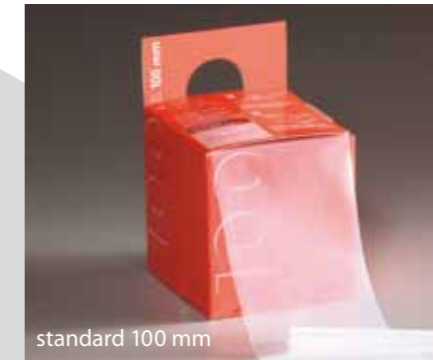

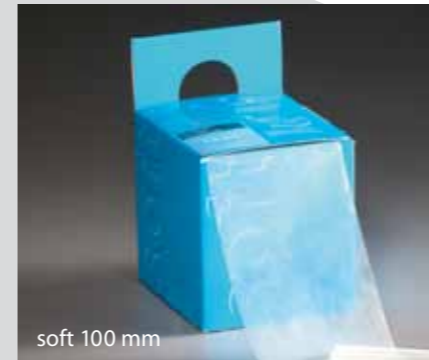

**Open sanstrap to form a loop and pre-stretch it a little.**

**Simply stretch the band around the packages.**

**That's it. Quickly stretched and quickly secured.**

# A convincing variety of products

**Try us!**

We're happy to send you a sample. You can also purchase our starter kit with a re-usable metal box and three refill rolls.

sanstrap® stretchbands and sangrip® non-slip strips  
are the ideal combination for all your internal transport  
and logistics activities.
